Only \$13.98!

Wine 101

How It's Made

Wine has been made for centuries from just two simple ingredients; yeast and grape juice. Actually, just about any fruit juice can be used but the vast majority of wine is made from grapes. Yeast is the magical ingredient that turns juice into wine. Yeast is a living organism that feeds off of sugars in the juice in a process called fermentation. During this process, the sugars are converted into alcohol which results in wine.

Potent Potable

Flaming Jagerbomb

Jagermeister	1 shot
Red Bull	1 can

**Pour Red Bull into a tall glass.
 Pour Jager into a shot glass.
